Aspiring Data Engineer with strong foundations in SQL and Python, passionate about building scalable data pipelines and data-driven systems.

Hands-on experience in designing ETL workflows, automating data ingestion using Apache Airflow, and working with structured databases.

Eager to further develop expertise in data engineering tools and contribute to real-world data infrastructure projects.

AREA OF EXPERTISE

Programming: Python, SQL

Data Engineering: ETL, Data Pipeline, Data Ingestion

Tools: Apache Airflow, n8n, Power BI

Databases: MySQL, PostgreSQL, MongoDB

Concepts: Data Warehousing, Data Cleaning, Automation, Workflow Orchestration

PERSONAL PROJECTS

Data Analysis project

- Conducted descriptive statistical analysis using Excel and Stata
- Cleaned and processed raw datasets
- Applied statistical methods to extract insights from data

Film Data Pipeline Project

- Developed a web scraping system using Python (Selenium) to collect film data
- Built an end-to-end ETL pipeline to extract, transform, and load data into a database
- Stored structured data in MongoDB for efficient querying

PROFESSIONAL EXPERIENCE

Data Engineer Trainee

- Designed Airflow pipelines to automate daily ingestion of 1,000+ records from APIs and web sources
- -Built and managed ETL workflows with DAG-based scheduling and dependency handling
- Transformed raw data and loaded into PostgreSQL data warehouse (staging, ODS, data marts layers)
- Implemented logging and error handling to ensure pipeline reliability
